PROFESSIONAL SUMMARY

Senior Full-Stack Developer with 8 years building and evolving enterprise applications across insurance, education, and automotive industries — owning systems end to end through multi-year client relationships, from initial maintenance to architecture decisions and legacy-to-modern migrations. Core strength in .NET 8/C#, Node.js and Vue/Nuxt, with hands-on experience integrating LLMs (Claude, OpenAI) into production workflows as part of broader application development.

CORE SKILLS

Backend: C# / .NET 8 / ASP.NET Core · Node.js · TypeScript · PHP · REST APIs · Microservices

Frontend: Vue.js / Vue 3 / Nuxt · React · TypeScript · Tailwind CSS · Vite

AI & LLMs: Claude API (function calling, tool orchestration) · OpenAI API · Prompt Engineering · Workflow Automation

Cloud & DevOps: Azure DevOps · CI/CD · Docker · GitHub Actions · Nginx · Linux

Databases: SQL Server · MySQL · Oracle (incl. legacy systems via ORDS) · MongoDB (basic)

Mobile: Flutter · Dart

Languages: Spanish — Native | English — Professional working proficiency

WORK EXPERIENCE

Chimp Web Studio — Full-Stack Developer

2018 – Present | 8 years

Agency delivering enterprise solutions across industries, with long-term, concurrent client engagements.

Client: Growth Institute — 2018 – 2026

Node.js, Vue/Nuxt, TypeScript, PHP, Flutter, OpenAI API, GitHub Actions, MySQL

2018 — Payments integration

- Integrated Stripe, Conekta, and PayPal payment gateways as part of the initial development team.

2020 – 2022 — LMS maintenance & support

- Maintained and extended a third-party Learning Management System, resolving issues and delivering integrations as the platform scaled.

2023 – 2024 — Custom LMS platform

- Built a custom LMS from scratch to replace the third-party solution, reducing operational costs.
- Integrated AI-powered features using the OpenAI API (function calling, agent patterns) to automate content workflows.
- Integrated internal systems with HubSpot via RESTful APIs; built CI/CD workflows with GitHub Actions.
- Built a cross-platform Flutter app (iOS & Android) for course consumption with offline mode; reached 1,000+ downloads.

2024 – Present — Ongoing platform evolution

- Deliver continued integrations, support, and improvements across the web and mobile platforms.

Client: Protección Familiar — Insurance Platform — 2019 – 2026

PHP, Node.js, Vue/Nuxt, MySQL, GitHub Actions

2019 – 2021 — Platform maintenance

- Maintained and extended an insurance operations platform built on a PHP/JavaScript MVC architecture.

2021 – 2023 — Performance optimization

- Developed scalable REST services for high-volume insurance operations, reducing API response times by ~40%.

Late 2024 – Present — Legacy-to-modern migration

- Leading a progressive, module-by-module migration of the platform from PHP to Node.js/Express with a Vue frontend, keeping the legacy system operational throughout the transition.

Client: SAVA Honda — 2025 – 2026

.NET 8, C#, SQL Server, Oracle, Azure DevOps, ABP Framework, Claude API

- Developed and maintained enterprise features using .NET 8 and C# in a Clean Architecture environment.
- Designed and implemented multi-level financial approval workflows with complex business logic.
- Designed and built an incremental data-sync architecture (Quartz.NET jobs, watermark-based windowing, idempotent upserts) to replace real-time calls to a 40-year-old Oracle system via ORDS, cutting a 3-hop network round trip down to a single local query and enabling a new automated monthly report.
- Optimized API performance and frontend UX across automotive enterprise modules; generated SQL reports and performed data migrations between SQL Server and Oracle.

NOTABLE PROJECTS

2025 – 2026

- AI Workflow Automation Agent — Enterprise AI agent using the Claude API with function calling and tool orchestration; processes natural language and executes multi-step workflows through .NET 8 APIs, with conversation memory in SQL Server and a React + TypeScript frontend.
- Promohabitat — Real estate platform with AI-driven automatic document classification and bank financing recommendations using LLM analysis.
- Legaliax — SaaS legal tools platform with tiered subscriptions, document quotas, and automated workflows.

EDUCATION & TRAINING

- Computer Science — Universidad Nacional Autónoma de México (UNAM) | 2014 – 2018
- Salud Digna AI Nutrition Challenge — Talent Land Jalisco 2023: built an AI-powered nutrition app using OpenAI agents with function calling to generate personalized meal plans end-to-end in a competitive, time-constrained environment. Received honorable mention.
